

Vision

Our objective is to be a leading provider of quality, innovative and robust solutions to Nuclear Measurement challenges worldwide. Delivered as product or service, we strive to deliver a quality experience, with our flexible innovative, economic approach to meeting our Customer's needs. We enable our clients, regulators and Stakeholders to meet their objectives by our exceeding their expectations via the timely delivery of responsive, flexible, optimised radiometric measurement solutions.

Commitment

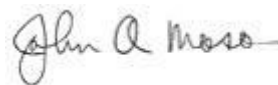

- ANTECH are committed to ensuring that our clients' needs and expectations are understood and met in full;
- are committed to identify and developing measurement techniques that help reduce the Nuclear waste assay legacy economically; and
- do so meeting the statutory and regulatory requirements supporting the design, manufacture and provision of solutions to the Nuclear Industry.

By

- Operating within an effective and efficient management system (AIMS) that is built on the experience of over 30 years in the Nuclear Assay sector;
- Where accountability for meeting client objectives lies with the individual, or leader responsible for delivery of the product or service.
- Continuously improving and supporting our products and services, and the effectiveness of our integrated management system;
- Early identification of risks and the execution of flexible measures to guarantee those clients' needs and expectations are fulfilled;
- Treating our equally and keeping their data confidential;
- Training and making our employees and contractors aware of our policies, procedures and our clients' needs and expectations; and
- Ensuring only authorised trained employees conduct accredited measurement activities.

Achieved through:

- Establishing, implementing, maintaining and improving the ANTECH integrated management system (AIMS); which comprises sections for:
 - Quality, independently certified to ISO 9001:2015;
 - UKAS accredited measurement program accredited to ISO / IEC 17025:2017;
 - Environmental management section that implements the requirements of ISO 14001:2015;
 - Health & Safety section that implements the requirements ISO 45001:2018; and
 - GDPR, HMRC Import / Export and CE Compliance.
- Understanding our industry by monitoring and reviewing our context, the needs and expectations of our clients and interested parties with an aim to achieving customer satisfaction;
- Understanding the risk and opportunities to our business and acting upon them appropriately;
- Setting and reviewing appropriate measurable objectives in order to ensure measurable targetable improvement;
- Reviewing the effectiveness of AIMS through a robust and flexible audit program and annual management review; and
- Reviewing this policy and associated policies annually to ensure their continuing suitability.
