

Vision

To drive the most innovative, high quality, high performance, compliant Nuclear Measurement Solutions that address the changing demands Worldwide.

Mission

To support our Partners and Customers so they are well equipped to exceed the demands placed upon them by customers, regulators, and stakeholders by the delivery of optimised integrated radiometric measurement solutions with our focus upon Quality, Safety, Reliability, Sustainability and Economy.

Commitment

ANTECH are committed to:

- Ensuring that our clients' needs and expectations are understood and carried out in full.
- Identifying, supplying and if unavailable, developing, measurement techniques that help reduce the nuclear waste assay legacy economically.
- Meeting the statutory and regulatory requirements supporting the design, manufacture and provision of solutions to the Nuclear Industry.

By

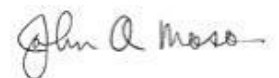

- Operating within an effective, efficient, and continuously improved Business Management System, built on our 30years experience in Nuclear Assay sector.
- Continuously improving and supporting our products and services, by monitoring and applying changes in EHS&Q requirements to maintain the effectiveness of our Business Management System.
- Treating our customers equally, keeping their data confidential.
- Training and awareness among our staff and contractors of our policies, procedures and, where required, our clients' needs and expectations.

Achieved Through

- Understanding our industry by monitoring and reviewing our context, the needs and expectations of our clients and interested parties with an aim to achieving customer satisfaction.
- Understanding the risk and opportunities to our business and acting upon them appropriately.
- Setting and reviewing appropriate measurable objectives in order to ensure measurable targetable improvement.
- Reviewing the effectiveness of our Business Management System through an internal audit program and annual management review.
- Reviewing this policy and associated policies as required to ensure their continuing suitability.

Measurement Services

- Measurement Services, including those accredited and unaccredited, shall be carried out in accordance with the principles of ISO 17025.
- All measurement services shall be carried out impartially, and ANTECH shall not allow external commercial, financial or other such pressures to affect our impartiality and duty to safety.
